ENVIRONMENTAL PRODUCT  
DECLARATION (EPD)

## ŁUKASIEWICZ – ICIMB FOR THE CARE OF THE ENVIRONMENT!

Environmental Product Declarations allow the customer to make conscious choices for the sake of the natural environment.

Environmental Product Declarations allow customers to choose the product with the best ecological characteristics from all available on the market.

## Environmental Product Declaration – EPD

Environmental Product Declaration (EPD) is a verified document which provides information about environmental impact of a product in its life cycle, including raw materials extraction, transport, production process and end-of-life stages, including disposal and recycling.

### EPD's are created based on the following standards:

- PN-EN ISO 14025 Environmental labels and declarations. Type III Environmental Declarations. Policies and procedures
- PN-EN 15804+A2 Sustainability of construction works - Environmental product declarations - Basic principles of categorization of construction products

### Benefits for the Manufacturer:

- By having EPD's for its products a company informs the market that it's responsible and eco-friendly
- Products with EPDs have an advantageous position on the market, because give additional benefits when applying for Sustainable Building Certification (DGNB, LEED BREEAM etc.).

**Environmental Product Declarations make assessment of the effectiveness of the manufacturer's actions for the sake of the natural environment possible!**

**Choose consciously and be ECO!**
